

Virtual Classroom 1-2-3

Virtual Classroom 1-2-3 helps you create an engaging virtual classroom experience while showing you tips and techniques you can easily apply to other virtual courses. With very little time needed on your part, you'll be able to...

- Exploit technology tools to stimulate interaction and accelerate learning
- Speed time needed to “translate” an existing classroom course---or a new one-- into a powerful virtual learning experience
- Learn while you work—as we work together to design your course, you'll discover tips and processes that you can use anytime, with any course

Here's how it works:

Interviews and review of documentation...

- Understand learning objectives by audience, desired levels of competency and other key information
- Review course content and existing technology options
- Identify likely trainers/facilitators for virtual delivery

1. Discovery/ Assessment

Team brainstorming session...

- Engage in a real-time conversation to develop the basic course framework, including prework, follow-up, delivery and course material
- Identify the best uses of asynchronous and synchronous activities and tools
- Agree on an ideal facilitator/trainer profile

2. Real-time Brainstorming

Strategic framework and comprehensive recommendations:

- Map out specific recommendations based on Steps 1 and 2, combined with our knowledge of best virtual learning practices
- Outline suggested training and skill-building requirements for training facilitators
- Provide guidelines and principles that can be applied to other virtual classroom courses

3. Strategic Roadmap

Getting started is easy. Just give us a call at 978.263.2545 or send us an email to set up a quick exploratory call so we can determine how *Virtual Classroom 1-2-3* can work for you.
